PRACTICAL NO.06

Write the program for the following:

a. Create a web application for inserting and deleting records from a database. (Disconnected) Code:

```
Aspx Code:
```

```
<a href="#"><%</a> Page Language="C#" AutoEventWireup="true" CodeBehind="WebForm1.aspx.cs"
Inherits="DisconnectedDB.WebForm1" %>
<!DOCTYPE html>
<html xmlns="http://www.w3.org/1999/xhtml">
<head runat="server">
       <title></title>
</head>
<body>
       <form id="form1" runat="server">
              <asp:Button ID="Button2" runat="server" OnClick="Button2 Click" style="top: 157px;
left: 144px; position: absolute; height: 29px; width: 68px" Text="Delete" />
              <asp:Label ID="Label1" runat="server" style="top: 204px; left: 26px; position: absolute;
height: 22px; width: 284px"></asp:Label>
              <div style="height: 265px">
                    RollNo: <asp:TextBox ID="TextBox1" runat="server"></asp:TextBox>
                    <br />
                    <br />
                    Name:   <asp:TextBox ID="TextBox2" runat="server"></asp:TextBox>
                    <br />
                    <br />
                    Contact:<asp:TextBox ID="TextBox3" runat="server"></asp:TextBox>
                    <br />
                    <asp:Button ID="Button1" runat="server" OnClick="Button1 Click" style="top: 156px;
left: 42px; position: absolute; height: 29px; width: 68px" Text="Insert" />
             </div>
       </form>
</body>
</html>
C# Code:
using System;
using System.Data;
using System.Data.SqlClient;
namespace DisconnectedDB
      public partial class WebForm1: System.Web.UI.Page
             SqlConnection con = new SqlConnection(@"Data
Source = (LocalDB) \setminus MSSQLLocalDB; AttachDbFilename = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus repos \setminus Diagram = C: \setminus Users \setminus TANMAY \setminus source \setminus TANMAY \setminus sou
sconnectedDB\App Data\Database1.mdf;Integrated Security=True");
             protected void Page Load(object sender, EventArgs e)
              {
             protected void Button1 Click(object sender, EventArgs e)
                    SqlDataAdapter ad = new SqlDataAdapter("select * from Stud",con);
                    SqlCommandBuilder cb = new SqlCommandBuilder(ad);
                    cb.GetInsertCommand();
                    DataTable dt = new DataTable("stud");
                    ad.Fill(dt);
                    DataRow dr = dt.NewRow();
                    dr["roll"] = Convert.ToInt32(TextBox1.Text);
                    dr["name"] = TextBox2.Text;
                    dr["contact"] = Convert.ToInt64(TextBox3.Text);
                    dt.Rows.Add(dr);
                    ad.Update(dt);
                    Label1.Text = "Record Inserted Successfully!!";
```

```
}
    protected void Button2_Click(object sender, EventArgs e)
       SqlDataAdapter ad = new SqlDataAdapter("select * from Stud", con);
       SqlCommandBuilder cb = new SqlCommandBuilder(ad);
       cb.GetDeleteCommand();
       DataTable dt = new DataTable("stud");
       ad.Fill(dt);
       DataRow[] dr = dt.Select("roll = " + Convert.ToInt32(TextBox1.Text));
       dr[0].Delete();
       ad.Update(dt);
       Label1.Text = "Record deleted successfully!";
Output:
```

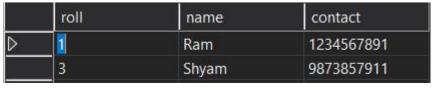

For insert:

| | roll | name | contact |
|------------------|------|--------|------------|
| \triangleright | 1 | Ram | 1234567891 |
| | 2 | Ramdas | 1234554321 |
| | 3 | Shyam | 9873857911 |

For delete:

b. Create a web application to display Using Disconnected Data Access and Databinding using

```
ROLL NO.00
```

```
GridView.
